

# Computer Bargains

## YOU CAN'T AFFORD TO MISS!

Absolutely unbelievable bargains... this must be the sale to end all sales! We're rationalising our range - prices have been savagely slashed to make way for new stock. Most of the items on these pages are down to virtually cost price - many way, way below!

Just look at the savings on the incredible Sorcerer or our top quality Daisy Wheel Printer. You'll agree that you'd be crazy to miss bargains like these. One thing's for sure. There'll never be another chance like this one. So hurry in to your nearest Dick Smith store - not tomorrow, but yesterday if you can make it!

### Economy B & W Monitor

The System 80 doesn't need a video monitor, but can be used with one. A video monitor gives the sharpest, clearest image - and this one is really economical. It can be used with most computers on the market - and is much cheaper than other brands! Compare, and be surprised!

Cat. X-1198  
COVER  
Cat. X1197 \$6.50

**\$149<sup>50</sup>**

### Economy Green Phosphor Monitor

If you're seriously into computers then this is the monitor for you. Provides a sharper, brighter image, and you avoid eye fatigue! Suits more for the professional rather than the hobbyist.

Cat. X-1198

**\$199**

### Unleash the potential of your System 80

A terrific model - now with extra value! The first row of the 16K RAM is taped as standard in this unit with provision for an extra 16K (which gives the System 80/EK extension unit 32K total memory). And it's \$100 cheaper than the previous model! It provides as standard a floppy disk controller capable of controlling up to 4 single density disk drives. Although the extension of this model is similar to the previous model, there are significant changes internally. The RS-232C interface & connector are now only available as an option. The 8-10U mini-board has been removed and is available as a separate option for those who require 5-10U expansion capability.

### Save a fortune on Disk Drives System 80 Disk Drives

Our disk drives go much further... for so much less! These superb disk drives cost so much less than the Tandy disk drive and they incorporate a high-quality mechanism together with matching inbuilt 240V power supply. Each drive has high storage capacity - 40 tracks and is suitable for both single and double density recording. With double density recording, you can store more than 180K bytes per diskette! The disk drives are suitable for use with most computers and disk controllers using the standard 34-way connection bus - such as the System 80 and TRS-80. (Don't pay their prices for disk storage!)

\* Already configured for the two drives most users need: drive 0 (Cat. X-4060) and drive 1 (Cat. X-4061).

NEW LOW PRICE

SAVE \$250

### the amazing BLUE LABEL SYSTEM 80

There's never been a computer available before with the sophistication of the NEW System 80 at such a low price. This very popular computer has been completely redesigned and in being redesigned it has benefited from earlier products on the market. Shortcomings in operator requirements, technology improvements, etc. have all been taken into account in the design of the new system. It now includes features normally found in models costing much, much more - computers such as the APPLE and the TANDY. And now you can take advantage of our incredible price slash - save two hundred & fifty dollars over last year's price!

Why such a dramatic price decrease? Because so many System 80 computers have been sold, the initial huge development costs have been amortised. The System 80 now costs us less - so we pass this saving on to you!

But hurry: prices must start rising soon. The decreasing value of the Australian dollar and high inflation means that we won't be able to hold this low, low price for too long. Buy now and save!

**\$499**

## The incredible SORCERER

**SAVE \$896.00**

look at Dick's prices for quality

## FAMOUS NAME Micropolis Disk Drives

**SAVE UP TO \$855**

You can have from one to four drives, giving up to 1260 K bytes (yes - more than a Megabyte!) of storage at the incredibly low price of only 0.2 cents per byte!

The Micropolis 1043/1023 system represents third generation, state-of-the-art mini-floppy disc technology. It comes from the Micropolis Corporation, the company which has done most to develop the 134mm mini-floppy disc as a reliable high density storage medium and a worthy successor to the older 205mm disc. At the heart of the 1043/1023 system is 'quad density' technology, developed by Micropolis. This packs no less than 77 tracks each of 16 sectors onto each disc, instead of the usual 35 or 40 tracks of only 10 sectors. The result is an incredible 315,000 bytes of usual storage on each disc - from FOUR TO SEVEN TIMES the capacity available on other systems.

With the Micropolis 1043/1023 system you have the highest possible storage capacity for outstanding value for money.

Micropolis 1043/mod 2 Drive with S-100 controller. Cat X-3205

Micropolis 1023/mod 2 add-on Drive Cat X-3208

CAN ALSO BE USED WITH THE SYSTEM 80 AND OTHER COMPUTERS

**SPECIFICATIONS:** 240V 50Hz input power requirements; 315K bytes, formatted, capacity per drive; Transfer rate of 250K bits per second; Access time - track-to-track is 50ms; Stepper motor with lead screw drive; Rotational speed of 300rpm; Recording mode is MFM; Track density of 100 tracks per inch (TPI); One per disc surfaces.
